

MODULE: *Matter 1*

Activity Sheet 1.13: Report

Your task: Your report to HQ

It is time to make a detailed report to the boss at Apprentice Headquarters.

You will have developed an understanding of the basic particles which all materials are made from. But the boss has some specific questions for you:

- What are the basic sources of material to make stuff?
- Why are these called 'raw materials'? Do we cook them?
- We've got lots of wood and plants. Why can't we make these into metal?
- Why do some materials have more useful properties than others?
- What can we do to change the properties of a material?
- What raw materials are available in our country that we could use to make better products?
